OBJECTIVE

Software Engineer and Data Analyst with 2+ years of experience in data analysis, software development, and academic research, skilled in Python, SQL, and cloud technologies. Seeking full-time roles in Software Engineering or Data Analytics to apply analytical thinking, problem-solving skills, and technical expertise in real-world systems.

EDUCATION

Master of Science in Computer Science, University of Houston Clear Lake – GPA 3.667 May 2026
Coursework: Analysis of Algorithms, Software Engineering, Database Systems, Mobile Development.

Bachelor of Computer Science, New Horizon College of Engineering, Bengaluru, India - GPA: 3.6 2020 - 2024
Coursework: Web Frameworks and Technologies, Data Mining and Machine Learning, Object-Oriented Programming, Cloud Computing .

SKILLS

Technical Skills	Python, Java, JavaScript, Swift, AWS, Bedrock, Lambda, with knowledge in data structures.
Data Technologies	NumPy, Pandas, LangChain, Agile, Scrum, Unit Testing, DynamoDB, SQL, MySQL.

EXPERIENCE

Graduate Teaching Assistant University of Houston Clear Lake	August 2025 - Present <i>Houston, TX</i>
--	---

- Assisted professors in delivering undergraduate and graduate-level courses by supporting students with programming, data analysis, and core computer science concepts.
- Supported course content related to Artificial Intelligence, Data Modeling, and Software Engineering, reinforcing theoretical concepts with practical examples.
- Guided students through Python, Java, SQL, and data structures assignments, improving their understanding of problem-solving and analytical thinking.

Data Analyst Intern Wynswell Global (3 months)	March 2024 - May 2024 <i>Bengaluru, India</i>
--	--

- Analyzed and processed large datasets using Python (Pandas, NumPy) to uncover trends and generate actionable business insights.
- Building interactive dashboards and visualizations using Streamlit, enabling stakeholders to make data-driven decisions efficiently and wrote optimized SQL queries to extract, aggregate, and analyze data from relational and NoSQL databases (MySQL, DynamoDB).
- Collaborated with cross-functional teams to translate business requirements into analytical solutions and clearly communicate findings.

PROJECTS

Data Analytics and Software Project: Designed an end-to-end data analytics project involving data collection, preprocessing, analysis, and insight presentation. Applied Python and SQL to clean, transform, and analyze datasets with a focus on accuracy and reproducibility. Delivered insights through clear reports and visualizations while following Agile development practices.

Unified Student Analytics and Management Platform: Developed a unified web-based platform to manage student, hostel, and academic data with integrated analytics capabilities. Built scalable REST API's using React and Node.js, and applied Python, SQL, and Pandas to analyze data and generate actionable insights. Deployed backend components on AWS while following Agile development practices with proper documentation and version control.
